

We have all heard the popular game called, "Among Us". "Among Us" was released on June 18, 2018. "Among Us" became popular towards the end of 2018 and the start of 2019. It became popular when YouTubers started playing the game. Since then, "Among Us" became popular with 75 million downloads.

YouTubers get roughly one million views on videos. Many "Among Us" servers have been hacked, but you might not know that you're being hacked. Check your screen during a game. Is it a black screen? If so, you're being hacked. If you do not have a black screen, you're good. When joining a server, there may be some technical difficulties where it won't let you in or it would say: "Server has already started," or "Server is full, "

InnerSlothLLC has given us many great memories, but who is this "InnerSlothLLC?" InnerSlothLLC is a man named Marcus Bromander. Marcus is known for creating other games like "Henry Stickman". During his time creating games, he is also a well-known animator, artist, and voice actor.

If you have not played Among Us, I highly recommend that you try it! You will not be sorry.
